Summary

As a freelance website developer, I have improved sales, customer satisfaction, and brand integrity by developing and managing amazing websites with WordPress and Next.js. While as a website developer at ETL Engineering Services Ltd, I proposed and anchored the development of IT-based courses in the company, boosting the company's profits and reputation.

I am passionate about learning and applying new and efficient technologies that enhance web development and user experience. I have completed multiple online courses and certifications in web design, Figma, Strapi.js, and Tailwind CSS. I am also pursuing a Bachelor of Engineering degree in Mechatronics, Robotics, and Automation Engineering from the Federal University Oye-Ekiti, where I have developed data analysis models with MATLAB and bespoke projects with Arduino, Micropython, C & C++, and Python.
